# MAYDAY

\_2017

design  
GI-RA

Modello e design registrato, brevetto depositato  
*Registered model and design, patent filed*

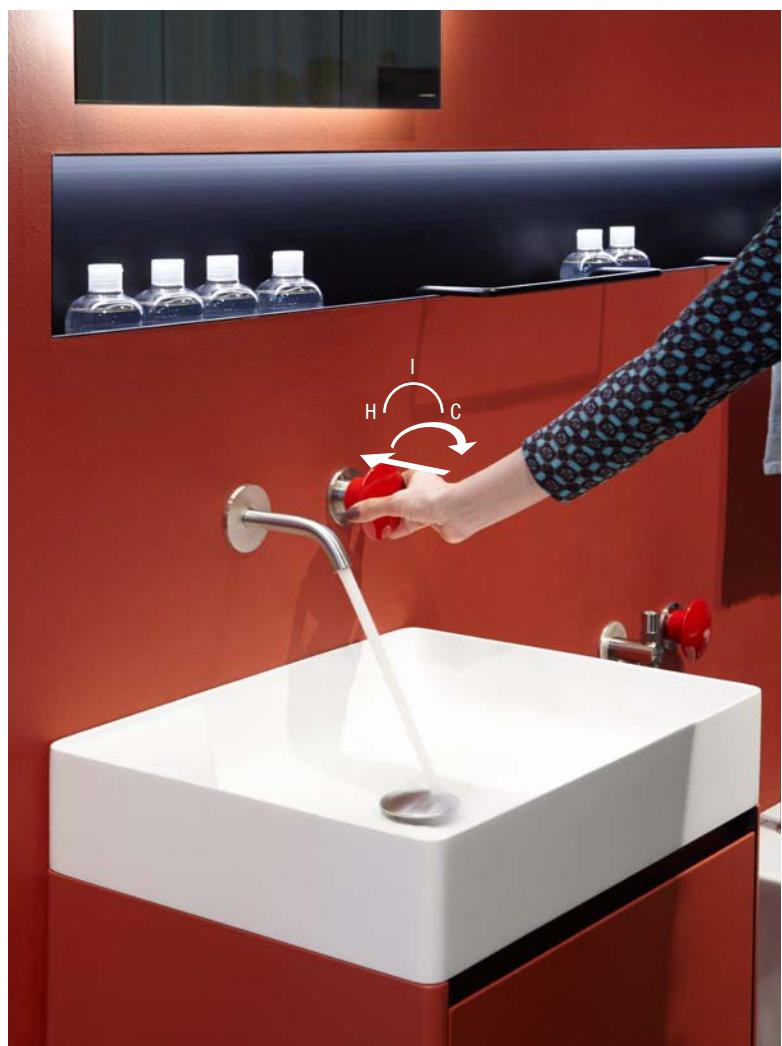

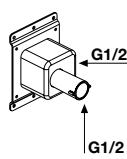

Ironico nel suo sembrare altro, divertente per la modalità smart di funzionamento, accattivante nel dare un tocco di colore ad ogni spazio doccia, invitante perché se è vero che nell'immaginario collettivo è un pulsante di emergenza da utilizzare solo in caso di estrema necessità, quante volte siamo stati tentati dal premerlo per vedere cosa in realtà sarebbe successo? Gi-RA design presenta un progetto che gioca sul ribaltamento di significato trasformando un pulsante d'emergenza in un comando da utilizzare tutti i giorni, come sottolinea anche il nome: Mayday è un miscelatore monocomando a parete remoto adattabile a più utenze, rubinetto lavabo, soffione, doccetta. Insomma se non si resiste alla voglia di premerlo, si può andare incontro a una sorpresa. Il ribaltamento di significati infatti, diventa ancora più spinto quando si considera il suo funzionamento. L'acqua si apre infatti, grazie a un movimento assiale, non come ci si aspetterebbe premendo il pulsante, ma tirandolo verso di noi. La miscelazione del getto d'acqua avviene ruotando a dx e sx il pulsante mentre, per chiudere il getto basta premerlo. Un modo nuovo di interpretare il miscelatore e ridefinirne caratteri e modalità di funzionamento.

*Ironic in its style and fun for its smart operating mode, attractive in giving a touch of color to any shower space, inviting because it seems like an emergency button to be used only in case of extreme necessity, how many times we were tempted to press one and see what actually would happen? Gi-RA design features a design that plays on meanings transforming an emergency button in a command handle to use every day: Mayday is a remote wall mixer suitable for sink taps, showerheads or hand showers. The water opens by means of an axial movement, not as you would expect by pressing the button but pulling it toward us. The mixing of the water jet takes place by turning right or left while pressing the button closes the jet. A new way of interpreting the mixer and redefining characters and modes of operation.*

## MINIMAYDAY design GI-RA

Modello e design registrato, brevetto depositato

*Registered model and design, patent filed*

Dal fratello maggiore ha preso l'immagine ironica e divertente, l'immediatezza del gesto, la capacità di dare gioia e colore allo spazio doccia, pur con dimensioni più contenute. La manopola esterna di MiniMayDay ha infatti un diametro di due centimetri inferiore rispetto a quella di MayDay (6 cm contro 8 cm) ma conserva intatte le caratteristiche del progetto originale. Un miscelatore monocomando a parete remoto adattabile a più utenze, rubinetto lavabo, soffione, doccetta, che nasce dal ribaltamento di significato che trasforma un pulsante d'emergenza in un comando da utilizzare tutti i giorni, come sottolinea il nome stesso. Rimane invariata la modalità smart di funzionamento. L'acqua si apre grazie a un movimento assiale, non come ci si aspetterebbe premendo il pulsante ma tirandolo verso di noi. La miscelazione del getto d'acqua avviene ruotandolo a dx e sx il pulsante mentre, per chiudere il getto basta premere il pulsante. Come MayDay anche MiniMayDay propone una finitura in Acciaio Inox Satinato con manopole coordinate nella stessa finitura, oppure in grafite, vernicate rosse o bianche.

*Ironic and funny image taken from its big brother, the out rightness of the gesture, the ability to give joy and color to the shower space even with smaller dimensions. The external knob of MiniMayDay has in fact a diameter of two centimeters less than that of MayDay (6 cm against 8 cm) but retains intact the characteristics of the original design. A single-lever wall-mounted mixer suitable for multiple usage, sink faucet, showerhead, hand shower, which arises from the overturning of the meaning to transform an emergency button into a command handle used every day, as the name underlines. The smart mode of operation remains unchanged. The water opens thanks to an axial movement, not as you would expect by pressing the button but by pulling it towards us. The mixing of the water jet is done by turning the button to the right and left while, to close the jet, just press the button. Like MayDay, MiniMayDay offers a satin stainless steel finish with coordinated knob, or in graphite, lacquered red or white.*

DEVIATORE MAYDAY 5 VIE  
MAYDAY 5 WAYS DIVERTER

Un trasferimento di significato, un'immagine conosciuta che diventa altro acquisendo un nuovo senso, un'esigenza funzionale risolta attraverso un progetto espressivo che diventa simbolo della contemporaneità di antoniolupi. Una soluzione che conferma l'attenzione dell'azienda a combinare aspetto formale e tecnologia, finalizzate a migliorare la qualità della vita dell'uomo. Al MAYDAY, che ha ridefinito l'archetipo del miscelatore trasformando gesti e azioni quotidiane consolidate, è stato aggiunto il deviatore a 5 vie per poter abbinare il miscelatore ai soffioni multifunzionali dell'ampia gamma antoniolupi, decidendo la tipologia del getto e gli scenari wellness possibili. Dal punto di vista formale è l'estetica dell'orologio il riferimento esplicito di questa manopola cilindrica che riporta lungo il perimetro i numeri romani che indicano quale dei diversi getti verrà attivato.

L'eleganza dello stile, la qualità dei materiali e la purezza della forma permettono a Mayday di esaltare qualsiasi contesto di design, impreziosendo lo spazio doccia e facilitandone l'utilizzo.

*A transfer of meaning, a sign that is already known that becomes something else, gaining a new sense, a functional need solved by an expressive project that becomes a symbol of antoniolupi contemporaneity. A new solution that confirms the company's attention to combine design and technology, aimed at improving quality of everyday life. MAYDAY, which has redefined the archetype of mixers by transforming gestures and daily consolidated actions, becomes also a 5 way diverter that can be combined with the wide collection of multifunctional showerheads by antoniolupi. The new 5 way diverter dictates the type of jet and therefore different wellness scenarios. From a design point of view, the shape of a clock is the explicit inspiration of its cylindrical handle showing in roman numbers which of the different jets will be operated.*

*The elegance of style, the quality of materials and a clean design, allow MAYDAY to decorate any shower space with an easy to use system.*

# FILTRO / FILO

\_2018

design  
GI-RA

La prima è tonda e i fori sulla superficie rimandano immediatamente all'immagine di un filtro, la seconda è un mincilindro, dritto, perfetto, che completa idealmente il tracciato generato dal tubo flessibile. Filter e Filo sono le nuove doccette grazie alle quali antoniolupi prosegue nel percorso di ridefinizione di questo elemento funzionale. Dopo aver ridisegnato con le precedenti collezioni l'archetipo di questo oggetto, le nuove proposte ne enfatizzano la presenza con eleganza e rigore, integrandolo allo stile di tutti gli accessori. Il flessibile interamente in silicone e disponibile nei colori Nero, Bianco e Grigio, disegna sulla superficie un motivo sinuoso che diventa un "decoro mobile". Dopo l'utilizzo infatti, la doccetta può essere riposizionata in un incastro laterale o in alternativa appoggiata sopra il supporto. Alle valenze estetiche le doccette associano le straordinarie qualità dei materiali utilizzati che conferiscono igienicità e garantiscono un getto potente e preciso.

*The first is round and the holes on the surface immediately refer to the image of a filter, the second is a mini cylinder, straight, perfect, which ideally completes the path generated by the flexible tube. Filter and Filo are the new handshowers thanks to which antoniolupi continues in the path of redefining this functional element. After redesigning the archetype of this object with the previous collections, the new proposals emphasize its presence with elegance and rigor, integrating it with the style of all the accessories. The all-silicone hose, available in Black, White and Grey, draws a sinuous pattern on the surface that becomes a "floating decoration". After use, in fact, the shower can be repositioned in a lateral joint or alternatively resting on the support. To the aesthetic values, the showers combine the extraordinary qualities of the materials used that give cleanliness and guarantee a powerful and precise jet.*

# AYATI

\_2011

design  
Massimo  
Broglio

Modello e design registrato, brevetto depositato  
*Registered model and design, patent filed*

Un programma di rubinetteria per soddisfare le più diverse esigenze estetiche e funzionali, grazie all'ampia offerta dimensionale e alla possibilità di realizzare canne su misura. AYATI esalta la perfezione della geometria circolare, attraverso l'integrazione di forme cilindriche di diverso diametro che definiscono corpo, bocca, manopola e piccola leva di comando del miscelatore.

Una collezione realizzata interamente in acciaio inox AISI 304 satinato e lucido, materiale con ottime qualità igieniche che non subisce alterazioni del tempo. Disponibile nella versione AYATISIMPLE che identifica proposte da piano o da terra caratterizzate da una geometria fluida e continua, dal taglio contemporaneo, perfette per lavabi d'appoggio con altezze consistenti o per soluzioni free standing.

*A program to satisfy the most different aesthetic and functional requirements thanks to a large array of sizes and possibilities of customizing spout lengths. AYATI enhances the perfection of circular geometry through the integration of cylindrical shapes in different diameters which define the body and mouth, handle and mixer control lever.*

*A complete collection made from stainless steel AISI 304 satin or polished with a excellent hygienic quality that doesn't undergo alterations with time. Available also in the AYATISIMPLE version that identifies solutions for freestanding or counter top washbasins.*

design

Carlo

Colombo

Un carattere contemporaneo e deciso, determinato dalla sezione rettangolare della bocca di erogazione sottile e slanciata. Un perfetto equilibrio geometrico e proporzionale tra bocca e corpo del miscelatore che definisce un'immagine moderna e un mix armonioso di forme diverse. La collezione di rubinetteria Bikappa, si arricchisce di due nuove finiture in linea con le ultime tendenze dell'interior design e in particolare dell'utilizzo sempre crescente di metalli nobili all'interno dell'ambiente bagno. Oro Rosa e Cromo Nero Spazzolato, sono le due nuove versioni, che amplificano la versatilità della collezione conferendole un carattere diverso per qualsiasi esigenza formale. L'oro rosa, assicura eleganza e gusto retrò alla rubinetteria per inserirsi anche in contesti classici, il cromo nero spazzolato, la proietta in una dimensione urbana e metropolitana fatta di estetica raw e riferimenti vintage. Entrambi assicurano nuove identità al miscelatore, perfette per alimentare quella contaminazione di stili che oggi interessa anche l'ambiente bagno.

*A contemporary character and determination established by the rectangular section of the slim and slender spout. A perfect geometric proportion and balance between the spout and the mixing valve defining a modern image and a harmonious blend of shapes. The Bikappa tap collection is enriched with two new finishes in line with the latest trends of interior design and in particular the increasing use of noble metals within the bathroom. Rose Gold and Black Brushed Chrome are the two new versions that boost the versatility of giving the collection a different font for any formal requirement. The rose gold ensures elegance and retro feel to the taps to also fit in classical contexts, brushed black chrome projects in the urban and metropolitan dimension made of raw aesthetic and vintage references. Both provide new identities to the mixer, perfect for powering the contamination of styles which now also are interesting in the bathroom.*

*Hand shower complete with bar and separate wall mount water intake with flexible hose 150 cm.*

# TIMBRO

\_2017

design  
Roberto  
Lazzeroni

Classica ma contemporanea allo stesso tempo, perfetta nella sua coerenza di linguaggio con gli elementi della collezione ILBAGNO, che va a completare con un'immagine coordinata e con una perfetta funzionalità di ciascun elemento. Gruppo lavabo a parete o da piano, colonna da terra per vasche free standing, blocco doccia con doccetta, gruppo per bidet. Una proposta completa che trova nel binomio tra la perfetta geometria cilindrica della canna di erogazione e il carattere forte delle manopole a stella il proprio tratto distintivo. Il tutto esaltato dai riflessi del cromo lucido.

*Classical but contemporary at the same time, perfect in its synergy with the collection ILBAGNO completing it with a coordinated image and perfect functionality of each item. Wall or deck mount sink sets, freestanding columns, shower sets and bidet sets: a comprehensive proposal that is in perfect synergy with the cylindrical body of the spout and the strong character of the star shaped command handles enhanced by the polished chrome highlights.*
